

# Honey Hole<sup>®</sup>

## ARTIFICIAL HABITAT

Imitating Nature's Design

## Honey Hole Grass Bed

### Assembly Instructions

#### To Assemble

**Step 1:** Separate the 12 stems into 3 piles according to the hole location.  
[SEE FIGURE 1]

**Step 2:** Take 4 stems with the same hole location and slide them onto a limb.

**Step 3:** Spread the stems along the limbs, 2 on each side of the center hole on the limb.

**Step 4:** Repeat that process for all limbs and stems.

**Step 5:** Put a flat washer onto the bolt

**Step 6:** Holding the bolt upside down (threads up), slide each limb onto the bolt, starting with the limb with the lowest stems first, then the middle, then the highest.  
[SEE FIGURE 2]

**Step 7:** Spread the limbs out into a star pattern.

**Step 8:** Layer each of the U-Brackets onto the bolt, putting each bracket in each of the spaces made by the limbs. [SEE FIGURE 3]  
(The limbs make a star and the weight makes a star) [SEE FIGURE 4]

**Step 9:** Hand tighten the nut until there's about an inch of the bolt showing.

**Step 10:** Adjust the stem spacing to your liking.

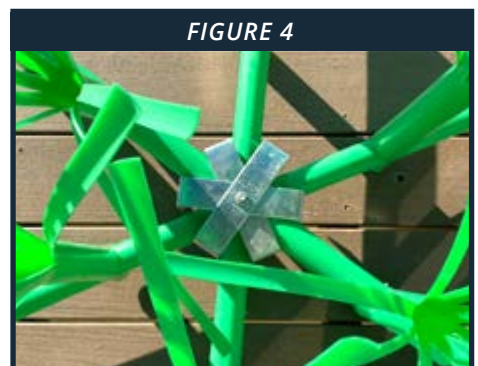

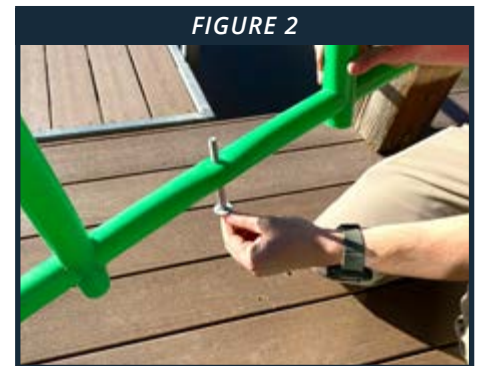

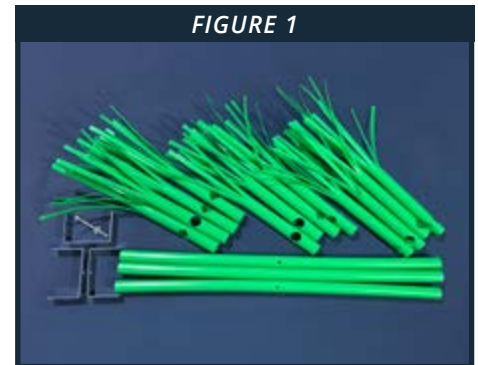

#### Install and Go Fishing!

**Step 11:** "Fluff the Leaves" by bending the splits of the limbs back against themselves

**Step 12:** Place Grass Beds in 2-3' of water in areas of no-little current.

#### Package Contents

- (3) 42" Base Limbs
- (12) 2' Stems
- (3) Galvanized U-Brackets
- (1) 5" x 3/8" bolt
- (1) 3/8" Flat Washers
- (1) 3/8" Lock Nut

**WARNING**  
Drowning hazard. Do not install where swimming and diving may occur.
