

Honey Hole Spawning Discs

RECOMMENDED PLACEMENT

We recommend adding up to 24 discs per acre in groups of 3 to 8. If your spawning area is limited, use larger groups of discs.

Install the discs in water that will be 18" - 24" deep.

Package Contents

Each unit consists of:

(1) 20" concave poly disc

Stake Option:

(1) 9" PVC stake

(1) flat washer

(1) Phillips head screw

Weight Bracket Option:

(1) Weight Bracket

(4) Self Drilling Screws

Discs with Stakes Assembly

- Place the washer between the head of the screw and the top of the disc.
- Place the stake below the disc.
- Attach the stake to the disc using a Phillips head screwdriver.
- To install: Push the stake into the ground leaving a gap of about 3" below the disc.

Discs with Weight Brackets Assembly

- Attach the weight bracket to the underside of the disc using the (4) included self-drilling screws.
- To install: Toss the disc into the water. The pre-drilled holes will allow the water to come through and the disc to sink to the bottom.
