*Updated January 2025*

# Our Mission

TO GET MORE FAMILIES AND  
FRIENDS TO SPEND MORE TIME  
TOGETHER....

*Down at the Pond*

# Our Commitment to Quality

We build all our products to last a lifetime for you and your family, with little to no maintenance. Our small pontoon boats are made almost entirely from aluminum, so they can be left out on the pond without having to worry about tarping or bailing out water. We build our floating dock frames from the highest quality metals and use some of the densest composite decking on the market to prevent splintering and cracking. We use food storage quality plastic to make our artificial fish habitat, so it won't ever off-gas harmful toxins into your pond. We choose the highest quality materials to build our products because we believe you should get the very best value for each hard-earned dollar you spend with us.

# Our Commitment to Customer Service

We're celebrating our 30th anniversary this year, and we've made it this far because we believe good business is based on good relationships. That's why our biologists are always willing to answer questions about your pond, even if it doesn't result in you buying something from us. We warranty every product we manufacture and go out of our way to make sure you get the most value possible from your purchase. And we love talking to our customers. If you don't believe that, give us a call. We'll prove it.

# The Pond King Difference

Texas weather provides a unique set of challenges when it comes to fisheries management and experience is the best teacher. Combined, our biologists have more than four decades of experience managing fisheries in this climate. They'll help you navigate the extreme temperatures, sudden storms, and the other issues unique to our region so you can accomplish your goals, whether that's growing trophy class fish or creating a retreat destination.

## LAKE MANAGEMENT PLANS

*A healthy pond means healthy fish*

Our biologists and technicians have the knowledge and the tools to effectively solve lake management problems early on, thereby preventing unnecessary expenditures and stresses associated with owning a pond or lake. Let our professionals manage for your objectives with regularly scheduled services including an on-site evaluation, preventative maintenance, and relevant improvements to your fishery through one of our maintenance contracts.

Estimating the cost of your maintenance contract is quick and easy. Scan the code to fill out our online calculator or contact us directly. The cost for a maintenance contract is determined by the number of ponds to be maintained, size(s), location(s), and the services you select, with a minimum of two services required. We also offer these services on-demand, without a contract.

## Lake & Pond Management

NOT ALL FISHERIES ARE CREATED EQUAL, BUT WE CAN HELP MAKE YOURS OUTSTANDING.

## ELECTROFISHING SURVEY

*Get more from your lake with annual surveys*

Using advanced electrofishing equipment, Pond King biologists safely and efficiently sample your fish populations. The data collected is analyzed and integrated into a lake management report specific to your goals. Each report contains our recommendations for critical management elements, including forage stocking, predatory harvest, habitat enhancement, and vegetation management.

Learn More

*Watch a survey  
in action!*

**POND  
KING**  
INC.

Electrofishing Survey

A large largemouth bass fish is shown lying on a measuring tape, which is placed on a dark, textured surface. The fish's head is at the bottom left, and its body extends towards the top left. The measuring tape shows markings in inches and centimeters. The fish has a yellowish-brown body with dark spots and a lighter underbelly.

## BASS HARVEST

### *Reduce competition to grow larger bass*

Successful harvest is a critical component of any management plan when controlling largemouth bass populations. We utilize electrofishing equipment to assist in the removal of size-specific bass so you can focus on raising and catching the fish of a lifetime.

## LAKE FERTILIZATION

### *Create a better foundation for your ecosystem*

Lake fertilization is a highly effective management technique that can transform the productivity of your fishery. A fertilized pond can produce up to four times as many pounds of fish per acre each year than a non-fertilized pond.

## WATER QUALITY MONITORING

### *Looks can be deceiving - know what's in your water*

Regular sampling and reporting of water quality parameters can help prevent harm to your fishery. Using data collected in the samples, we can develop a plan so you can enjoy your lake at its best.

## VEGETATION CONTROL

### *Effective treatment that won't harm your fish*

Controlling aquatic vegetation on your own can be difficult. Using herbicides or biological controls, our licensed commercial applicators can help you effectively manage vegetative growth.

## AERATION SYSTEM MAINTENANCE

### *Keep your fountains operating at their best*

Fountains, air diffusers, and surface aerators keep your pond looking beautiful and assist in supplying fish with oxygen during seasonal changes. We ensure these fixtures receive the maintenance they require.

## FISH FEEDER MAINTENANCE

### *Spend your time fishing, not maintaining feeders*

Using automatic fish feeders with the appropriate pelleted food can help establish a self-sustaining forage base. We ensure your feeders are consistently working, helping you achieve your fisheries goals.

## TURTLE REMOVAL

### *A simple solution for a common nuisance*

Our turtle traps help reduce the number of nuisance turtles in your pond. Installed and monitored by our biologists, these traps ensure the regular removal of captured turtles.

# The Pond King Difference

Stocking fish in Texas is a tricky business. Fish get stressed during transportation. Couple that with extreme heat or cold, and survival rates can plummet. Our fisheries biologists will help you choose the optimally-sized species and ideal quantities to reach your goals. And they have decades of experience safely delivering healthy fish at the right time of year to maximize their survival rate and your budget.

## One-Acre Stocking Recommendations

### GAMEFISH COMBINATION

Want a little bit of everything? This plan includes bass, crappie, and catfish and is a good combination for ponds 1 acre and up. Please everyone from kids with a Snoopy reel to avid fisherman who like a variety.

200	6-8" Channel Catfish
150	3-4" Black Crappie
80	6-8" Largemouth Bass
700	3-4" Coppernose Bluegill
15 lbs.	Fathead Minnows

### CATFISH-HYBRID BLUEGILL

This is a great stocking strategy for small ponds that are less than 1 acre. Catfish and hybrid bluegill grow quickly on feed and will not overpopulate. You could also add some hybrid stripers to the mix for a little variety.

400	6-8" Channel Catfish
500	4-4.5" Hybrid Bluegill
10 lbs.	Fathead Minnows

Fathead Minnow

Golden Shiner

Coppernose Bluegill

Redear Sunfish

Channel Catfish

Largemouth Bass

Black Crappie

### TROPHY BASS MIX 1

This plan has everything you need to start growing some lunkers. We use specifically sized baitfish and bass, so we can stock both at the same time. This saves time and will produce bass over 3 pounds by the third season.

100	1-3" Largemouth Bass
200	1-3" Redear Sunfish
800	1-3" Coppernose Bluegill
10 lbs.	Fathead Minnows

### TROPHY BASS MIX 2

Want to start catching bass this season? Use this plan and you will be setting a hook within a few months. Again, everything is included and sized correctly to produce bass over 3 pounds by the second season.

80	6-8" Largemouth Bass
200	3-4" Redear Sunfish
800	3-4" Coppernose Bluegill
15 lbs.	Fathead Minnows

### TROPHY BASS MIX 3

Want to take the family fishing next weekend? Better check the gear, because these bass are ready to fight! Grab some of our premium floating fish food and you'll soon need the wide-angle lens on the camera to capture your next proud moment.

70 lbs.	Adult Largemouth Bass
200	4-4.5" Redear Sunfish
800	4-4.5" Coppernose Bluegill
20 lbs.	Golden Shiners

# Fish Stocking Services

STOCKING FISH IN THE EXTREME TEMPERATURES OF TEXAS REQUIRES SPECIALIZED EXPERIENCE. WE MEASURE OURS IN DECADES, NOT YEARS.

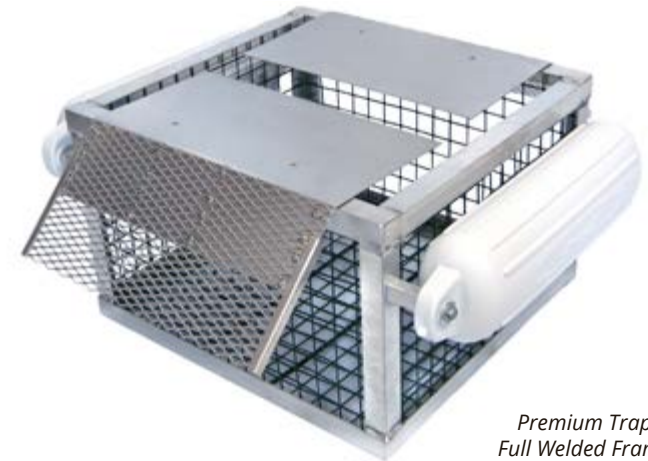

*Fish drawings courtesy of Joseph Tomelleri*

# Pond Management Products

MANAGED FISHERIES HAVE SPECIALIZED NEEDS. WE HAVE SPECIALIZED SOLUTIONS.

- Premium Trap: Fully welded aluminum frame
- Standard Trap: Partial aluminum frame
- Aluminum flippers
- Stainless steel hinges
- 23"x25"x16" cage with coated, galvanized panels
- Molded vinyl fenders
- Holds up to 50 adult sun-bathing turtles

*Premium Trap  
Full Welded Frame*

## The Pond King Difference

All our Pond Management products are designed with ease of use in mind and manufactured using the highest quality materials to ensure they last a long, long time.

[www.pondking.com](http://www.pondking.com) | (940) 305-6002

## *A feeder for every situation*

Even with the right mix of bait and game fish in your pond you may want to add more calories to your feeding program to grow those trophy bass and catfish. All three of these feeder options will allow you to supplement the food source of your pond or lake to grow bigger fish faster, so just choose the one with the right mounting options for your pond: floating, dock mount, or bankside.

### **MOUNTED FISH FEEDER**

- All-aluminum, welded frame & stainless steel hardware
- Premium powder coat
- 6-volt solar panel and battery
- "The Timer" – programmable up to 6 times daily
- Varmint guard
- Free up deck space - mounts to 2" square tube
- Drops half of feed straight down and other half about 3'-4' out in a semi-circle
- 50 lbs. capacity

### **TEXAS AVENGER FISH FEEDER**

- Solid steel construction
- Throws feed up and away about 15'-20' from dock or bank
- 12-volt system with solar panel and battery
- Tilts 45° with 180° horizontal rotation
- "The Timer" – programmable up to 6 times daily
- Hinged lid with strut
- 100 lbs. or 250 lbs. capacity

### **FLOATING FISH FEEDER**

- All-aluminum, welded frame & stainless steel hardware
- Premium powder coat
- Includes "The Timer" for feeding up to 6 times daily
- 12-volt solar panel and battery
- Varmint guard
- Dispenses feed about 6'-8' out from feeder
- 100 lbs. capacity

### **Floating Feeder Add-Ons**

- Weighted loop anchor kit - *Includes: 100' rope, stake, solid concrete block & swivels*
- On-demand remote control

VFX Aerating Fountains

Aeration provides your lake with an insurance policy by delivering a constant and predictable source of oxygen. This policy provides you with overall better water quality, algae control, better growth rates in fish, and better fish health and immunity. But really, the single most important reason to add aeration is to reduce risk of losing all of your hard work and money to a fish kill.

## AERATING AND DECORATIVE FOUNTAINS

*Delivering both superior oxygenation and aesthetic brilliance*

- Visually appealing spray patterns
- Breaks surface tension of the water to allow for better oxygen diffusion
- Decorative nozzles available that allow for an array of spray patterns
- Light kits allow for 24-hour enjoyment of fountains

DECORATIVE FOUNTAINS	HP
4400 JF (120v)	1
8400 JF (240v)	2

AERATING FOUNTAINS <i>1.5 hp/acre recommended</i>	HP	DISPLAY SIZE
3400 VFX (120v)	3/4	5.5' H x 21' W
4400 VFX (120v)	1	8' H x 26' W
8400 VFX (240v)	2	8' H x 32' W

### LIGHT KITS

- LED3C11 (3 lights)
- LED6C11 (6 lights)
- RGB3C5 (3 lights - remote controlled)
- RGB6C5 (6 lights - remote controlled)

J-Series Fountain w/ Mahogany Premium Nozzle

## POND SURFACE AERATORS

- Breaks up the surface water to allow for oxygen diffusion
- Designed for smaller/shallower ponds (10' or less)
- More function based than aesthetically pleasing
- Greatly reduces the risk of a fish kill

SURFACE AERATORS <i>1 hp/acre recommended</i>	HP	MINIMUM DEPTH
<b>3400 AF</b> (120v with bottom screen)	3/4	18"
<b>4400 AF</b> (120v with bottom screen)	1	19"
<b>8400 AF</b> (240v with bottom screen)	2	20"

## BOTTOM BASED AERATORS

- Designed for deeper water (10' or deeper)
- Circulates water to reduce stratification
- Limits low oxygen water from settling on the bottom
- Works best in conjunction with surface aeration

ROBUST AIRE BOTTOM BASED AERATION SYSTEMS	SURFACE ACRES
<b>RA-2</b> (2 Diffusers)	1-2
<b>RA-3</b> (3 Diffusers)	2-3
<b>RA-4</b> (4 Diffusers)	3-4

## Aerators & Fountains

WHEN IT COMES TO PROTECTING YOUR  
INVESTMENT, AN OUNCE OF PREVENTION IS  
WORTH A POUND OF CURE.

# The Pond King Difference

## SNAG-FREE FISHING DESIGN

Flexible limbs prevent tangles, making fishing easier and more enjoyable.

## BUILT TO LAST

Made from durable high and low-density polyethylene to withstand years of use in your pond.

## SAFE FOR YOUR ENVIRONMENT

Crafted from materials that don't release harmful toxins, keeping your pond healthy.

## PROMOTES A THRIVING ECOSYSTEM

High surface area encourages the growth of beneficial periphyton to support aquatic life.

# Fish Habitat

ALL FISH NEED COVER AT VARIOUS LIFE STAGES, FOR VARIOUS REASONS. WE HAVE ARTIFICIAL HABITAT TO COVER ALL OF THEM.

## QUICK AND EASY TO USE

Requires little to no assembly, so you can set it up and enjoy it right away.

## STABLE AND RELIABLE

Includes built-in weights to ensure the structure stays securely in place.

## NO HARMFUL ADHESIVES

Designed without toxic glues, ensuring safety for your fish and wildlife.

## MADE IN THE U.S.A.

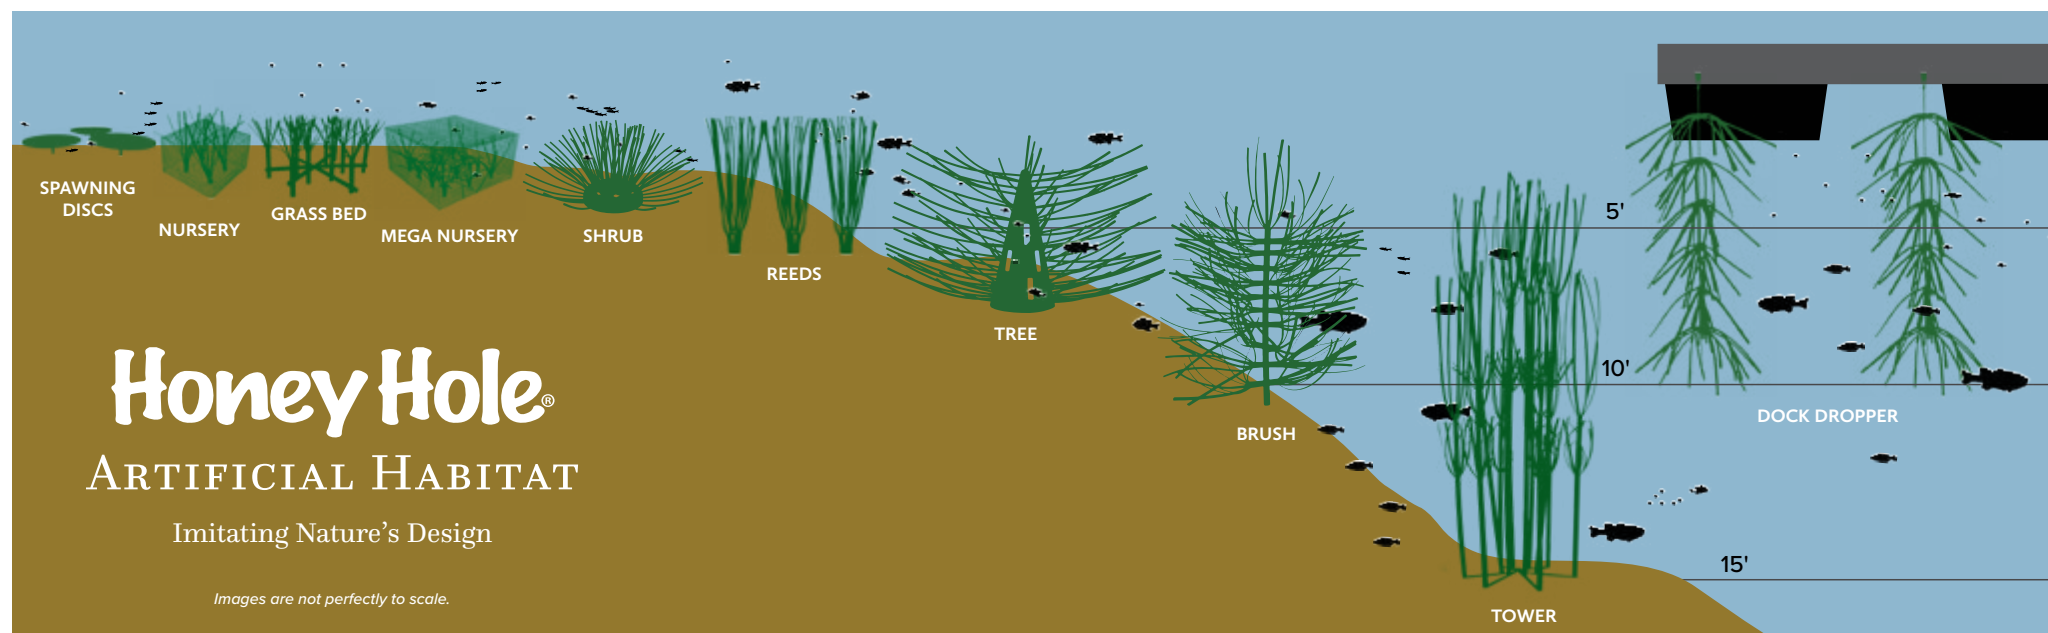

Proudly manufactured to deliver quality you can trust while supporting American craftsmanship.

## HONEY HOLE HABITAT

# Packages

## Need help finding the right habitat?

Our quick-start habitat packages are designed to create the perfect environment for fish growth and reproduction. Each package is based on your pond size and includes a variety of easy-to-ship, easy-to-deploy structures that provide shelter, feeding, and breeding areas, improving fish populations and overall water health. Whether you're starting from scratch or supplementing existing habitat, these versatile packages offer a great foundation for a thriving fishery. Remember, habitat enhancement can be done incrementally—add to your pond each season according to your budget to achieve your dream fishery!

### 1/2 ACRE PACKAGE

This is a great starter pack for a pond with little naturally occurring cover, providing at least some structure at several key life-stages and depths.

#### *Includes:*

- (4) Honey Hole Grass Bed
- (2) Honey Hole Reeds (*6 bases*)
- (4) Honey Hole Brush

### 1 ACRE PACKAGE

This package provides ambush points for predator fish and prime fishing spots, improving predator-prey interactions and supporting healthy fish populations—perfect for anglers and productive fisheries.

#### *Includes:*

- (8) Honey Hole Grass Bed
- (4) Honey Hole Reeds (*12 bases*)
- (12) Honey Hole Brush

### 3 ACRE PACKAGE

Designed for larger ponds, where you typically have deeper water, this package provides coverage throughout the water column and enhances areas with limited natural structure, creating essential shelter and feeding zones for fish.

#### *Includes:*

- (15) Honey Hole Grass Beds
- (12) Honey Hole Reeds (*36 bases*)
- (20) Honey Hole Brush
- (8) Honey Hole Tower

## Have a bigger lake?

For larger and more diverse lakes, we also offer customized habitat packages - including our full line of premium habitat products - tailored to your specific needs. Whether you're managing a large private lake or a community reservoir, our team can design a comprehensive, higher diversity habitat solution to maximize fish health and sustainability.

## CONTACT US TO QUOTE A CUSTOM PACKAGE

Earn rewards when you shop online at [pondking.com](https://pondking.com)

## How it Works

Activate your account by providing your name and email address and you're already on your way to earning store credit.

## Earning Pond Bucks

After you sign up, each time you purchase a product manufactured by Pond King on pondking.com, you'll receive Pond Bucks in the form of store credits in your account. Buy artificial fish habitat, earn Pond Bucks. Buy a dock, earn Pond Bucks. Buy a boat, earn Pond Bucks. Buy a turtle trap, earn Pond Bucks. Buy a Pond King fish feeder, earn Pond Bucks. You get the picture...

## Spending Pond Bucks

Each time you buy a Pond King product on pondking.com, you'll receive an email notifying you that you've received Pond Bucks and how many you've earned. The email will also include a gift code to use at check out the next time you purchase something at PondKing.com.

Once you've earned \$25 Pond Bucks, you're eligible to convert those to Bass Bucks to spend at our tackle shop, LakeProTackle.com, by sending us an email at admin@pondking.com.

# The Pond

## MEMBERSHIP CLUB

If you love spending time "Down at the Pond" as much as we do, join The Pond Membership Club to get the most from your Pond King experience.

## Member Benefits

- Account Management
- In-Store credit for PondKing.com purchases
- The ability to use your store credits at our tackle shop

# Bringing Ponds Alive

SINCE 1995

We've made it this far by building our business one happy customer at a time. We enjoy what we do, and we love visiting with our customers, so stop by whenever you are in the neighborhood. We'll feed the fish for you.
